SUMMARY

Front-End Developer with **3+ years** of professional experience building production web applications and interactive digital experiences using JavaScript, TypeScript, React, Angular, and Next.js. Experienced in translating product and design requirements into responsive interfaces while owning UI architecture, interaction, accessibility, and frontend systems

TECHNICAL SKILLS

Languages and Technologies: JavaScript, TypeScript, HTML, CSS.

Frameworks and Libraries: React.js, Angular, Next.js, Three.js, Tailwind CSS, Shadcn/ui.

Developer Tools: Git, GitHub, Vite, Appwrite, Supabase, Prismic, Storybook, Netlify, Vercel, AWS S3.

Design: Figma, Spline 3d, Lottie Animation, Adobe Suite, Blender.

EXPERIENCE

Front-end Developer

Artificial Reality

May 2023 – Present

Navi Mumbai, Mumbai

- Developed and maintained production **Angular** applications, translating Figma designs into **responsive**, reusable interfaces while maintaining visual fidelity across desktop and mobile breakpoints.
- Collaborate across design and engineering to translate concepts into responsive, interactive interfaces, with ownership spanning UI implementation, interaction design, UX refinement, and frontend development.
- Developed interactive 3D and immersive web experiences with Three.js, Babylon.js, WebAR/VR, and 8th Wall, working across real-time 3D environments and browser-based immersive applications.
- Contributing to an AI-powered car configurator/visualizer that combines conversational AI avatars with generative UI to create interactive vehicle exploration experiences.

Web-Developer and UI UX Designer

Freelance

January 2022 – Jun 2023

Mumbai, India

- Designed and developed responsive websites and landing pages for e-commerce and media clients, translating business requirements and design concepts into production-ready interfaces
- Conducted UX and SEO audits and implemented improvements to usability, responsiveness, content structure, and search visibility.

PROJECTS

Studio Blog Website | *React.js, React Hook Form, Redux Toolkit, Appwrite*

[Github](#) | [Live](#)

- Developed a fully functional blog platform with secure user authentication and CRUD operations using Appwrite.
- Implemented form handling and validation using React Hook Form to ensure reliable user input.
- Used Redux Toolkit for managing global state, improving code scalability and performance.
- Designed a clean, responsive UI with modern styling and smooth UX across devices.

Personal Website | *Reactjs, Tailwind, Framer Motion, MDX*

[Live](#)

- Built and deployed a content-driven portfolio using Next.js and React, combining frontend engineering, interaction design, and technical writing.
- Developed an MDX content pipeline with Velite for structured publishing of projects, experiments, and technical articles
- Designed and implemented reusable interactive components and motion-driven experiences to demonstrate frontend and design-engineering capabilities

EDUCATION

Ramrao Adik Institute of Technology

Bachelor of Electronics Engineering

Navi Mumbai, Mumbai

May 2022
